

Solving Equations Round Robin Math 1

Set 1:

1. $x + 3 = 10$
2. $3 + x = -12$
3. $8 = x - 12$

Set 2:

1. $3x = 8$
2. $10x = 5$
3. $x/2 = 10$

Set 3:

1. $5x - 12 = 18$
2. $15 = 2x - 5$
3. $3 - 8x = 9$

Set 4:

1. $5 + 8 = 2x - 5$
2. $4 - 3 = 2x - 7 - 11$
3. $5 + 6 = 2 - 4x - 3x$

Set 5:

1. $3x - 8 = 2x + 7x$
2. $8 - 7x = 3x + 5$
3. $4x - 8 + 2x = 24x$
