

Solving Equations Round Robin Math 2

Set 1:

1. $x + 3 = 10$
2. $3x = 12$
3. $8 = 5x$

Set 2:

1. $5 - 2x = 8$
2. $9 - x = 5$
3. $1/2x + 8 = 10$

Set 3:

1. $5(x - 3) = 18$
2. $15 = 2(2x - 5)$
3. $4(3x - 8) = 9$

Set 4:

1. $5x + 8 = 2x - 5$
2. $4 - 3x = 2x - 7$
3. $5 + 6x = 2 - 4x$

Set 5:

1. $3x - 8 = 2(x + 7)$
2. $8 - 7x = 3(x + 5) - 2$
3. $4(x - 8) + 2x = 24$
